As Engineering education has been thought to be necessary in India in view of the demand for engineers, a lot of stress has been laid on setting up new institutions. Engineers are thought to be an integral part of the system responsible for boosting the economy, along with the management professionals. To cater to the needs of the Industry, both the government and the education leaders are trying their best to introduce all-new innovations to the curriculum of Engineering education. While government-funded autonomous institutions like the Indian Institutes of Technology and the National Institutes of Technology are doing their best to give a fillip to education in the Engineering field, some private colleges are also trying to impart quality Engineering education to compete with the best of world-class institutions.
